Why use my services instead of an online platform?

There are many online platforms available on the Internet, that offer online tutoring. Many of these offer good pricing and convenience.

However, there are also some potential pitfalls.

- You can not always be sure, if your tutor fits your needs. Many platforms have tutors with little to no actual pedagogical experience.
- The contact to the tutor happens through a third-party platform, which can not always provide optimal, personalized customer services if issues arise.
- Lack of flexibility. Most platforms require you to book weekly or monthly packages. If your needs change along the way, it can be difficult to adjust.

When you book my tutoring services, you get a fully personalized experience. You also have direct contact with me via WhatsApp, phone, and email.

Your child has an individualized learning experience. My experience in working with a broad range of students means that I can cater to each student's individual learning style and level.
